Yadah invitation · Live (first batch, mock-up)

DRAFT

Run R0001 · 100 cards · card 4.5 × 2.75 in (114.3 × 69.85 mm) · 1/8 in bleed · kiss cut 1/8 in outside the fish · fish 102.0 × 51.0 mm · sponsored by Shattered into Beautiful Podcast

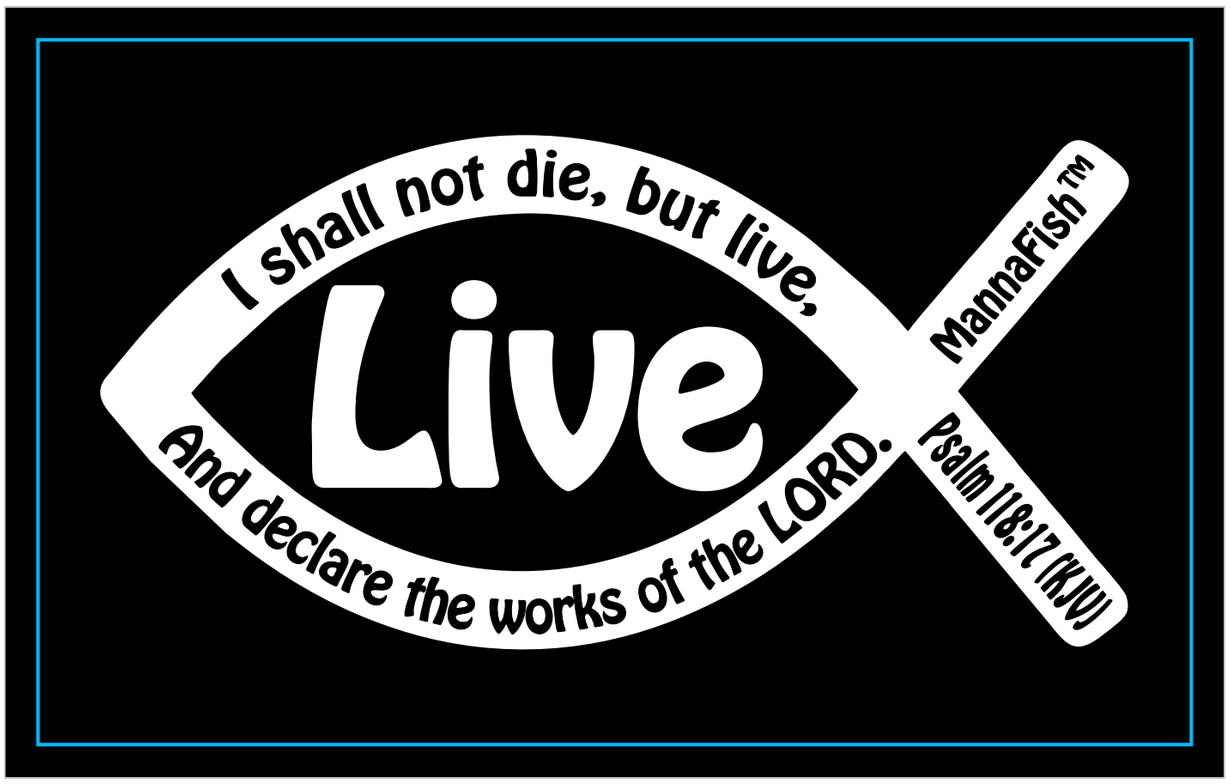

1 Decal · clear vinyl, white ink only

White ink where the fish is white. The letters and everything else stay clear. Pink line: kiss cut, vinyl only. Blue: the card edge.

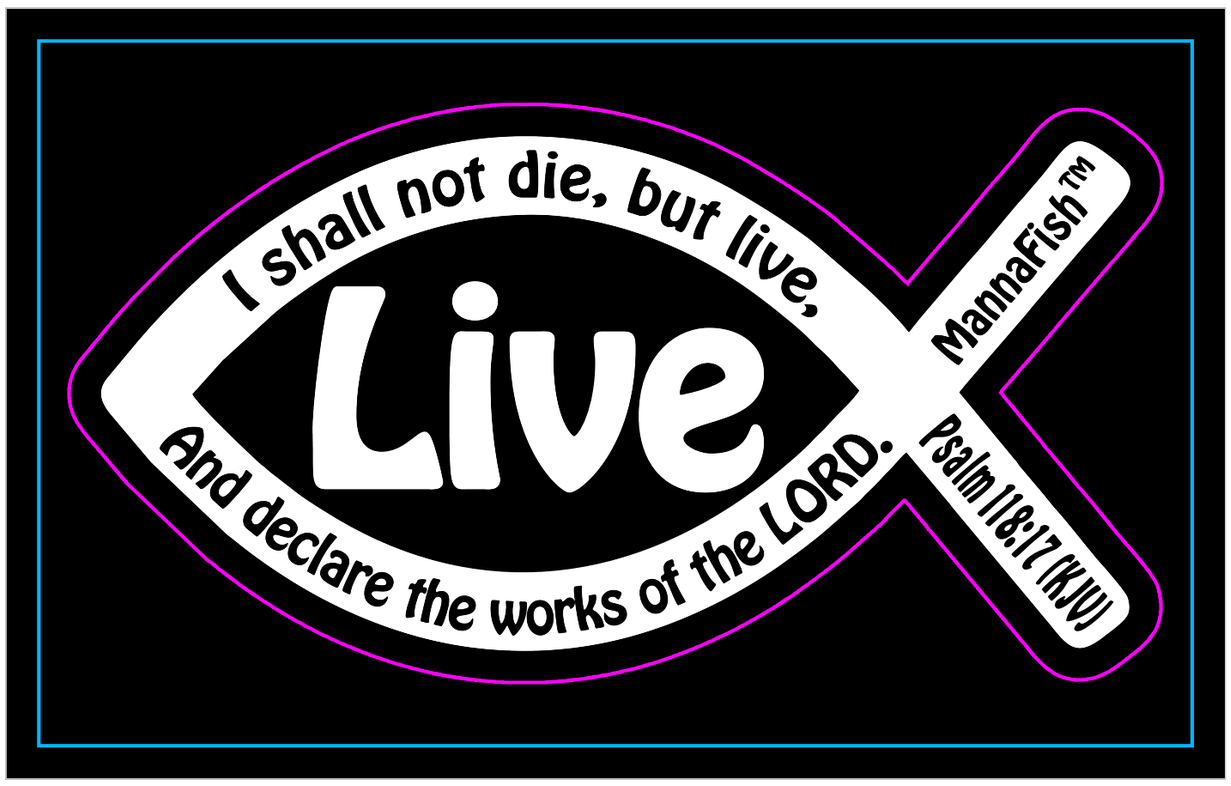

2 Printed on the front of the backing paper · under the decal

Printed on the backing paper itself, not on the decal: black to the edge, the same fish in white, lined up exactly under the decal. It stays on the card when the decal is peeled off.

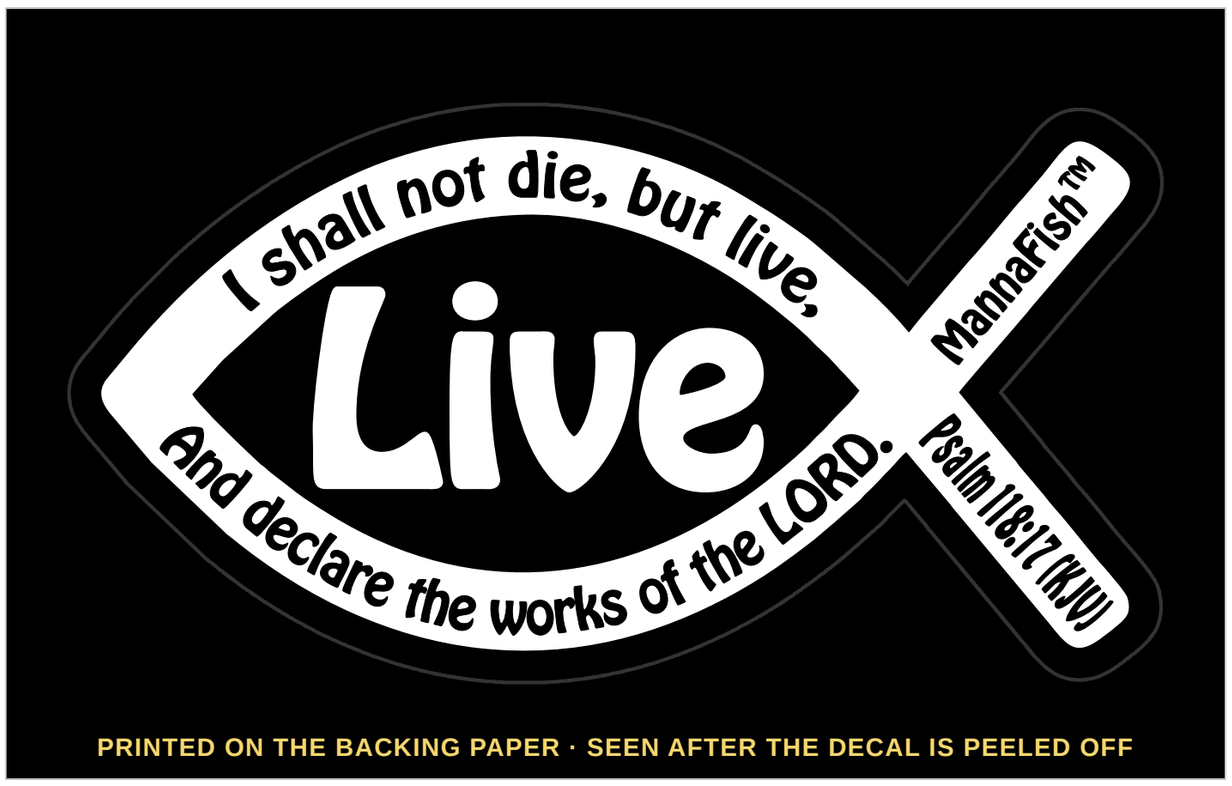

3 On the card, before peeling

The clear decal sits on top of the printed backing paper (layer 2). The black printed underneath shows through the clear letters, so the fish reads white with black letters.

4 After the decal is peeled off: the print on the backing paper

This black and white fish is **not the decal**. It is **printed on the front of the backing paper** (layer 2), under the clear decal, and is seen once the decal is peeled away. The thin grey line is where the kiss cut was; the clear vinyl left outside it sits on the printed black. (Gold words are a note, not printed.)

5 Back of the backing paper

Reads upright when the card is turned on its side. Blue: the card edge.

Before printing

- The sponsor logo is a stand-in (assets/shattered-into-beautiful-DRAFT.png). Upload the original logo before printing.
- The top logo is a stand-in (assets/yadah-logo-DRAFT.png). Upload the original logo before printing.
- QR R0001 (invitation) has no web address yet: it opens manna-fish.com until one is set.
- QR R0001s (Shattered into Beautiful Podcast) has no web address yet: it opens manna-fish.com until one is set.
- Every QR opens https://manna-fish.com/q/<code> (counts the scan, then goes on). That page has to be live on manna-fish.com before cards are printed.
- Status is "draft": approve the proof before ordering.
